PROFESSIONAL SUMMARY

Recently graduated with a BSc (Hons) in Information Technology from the University of Moratuwa, with 6 months of experience as a Software Engineering Intern. During my internship, I worked on real-world software development projects involving backend development, debugging, API integration, and cross-platform application support. Familiar with technologies such as Node.js, Spring Boot, React.js, MongoDB, and MySQL, with a strong interest in backend engineering and continuous learning.

EDUCATION

BSc (Hons) Information Technology | University of Moratuwa 2021 – 2025
GPA: 3.04 / 4.00

G.C.E. Advanced Level – Other Stream | Nalanda College, Colombo 2017 – 2019
Combined Mathematics (A), Physics (A), ICT (A) | Z-Score: 2.775

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript

Backend & Systems: Node.js, REST APIs, Spring boot

Frontend: React, Next.js, Material UI

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA

PROFESSIONAL EXPERIENCE

Software Engineering Intern | LiveRoom Technologies Jan 2024 – Jul 2024

- Developed and debugged a C++-based Adobe InDesign plugin for QBank DAM, improving application stability and end-user experience.
- Identified and resolved file download location bugs by analyzing call stacks and diagnosing SDK-level issues within the InDesign SDK.
- Implemented asset version update notifications during export workflows, alerting users to available cloud-based asset updates in real time.
- Designed and configured cross-platform installers for macOS and Windows, covering packaging and code-signing processes.
- Contributed to DhaibaWorks by enabling real-time 3D model updates and USD exports in NVIDIA Omniverse Presenter, improving interoperability with external 3D tools.

Technologies: C++, Adobe InDesign SDK, NVIDIA Omniverse, USD, macOS, Windows

PROJECTS

AI-Based Tourist Destination Chatbot | Final Year Research 2024 – 2025

- Designed and implemented an AI-powered chatbot providing accurate travel-related responses for a Sri Lankan tourist guide application.
- Applied a pre-trained NLP model (Rasa NLU) to classify user intent and select the most contextually relevant answers.

- Integrated outputs from a personalized recommendation engine and a review summarization module into cohesive chatbot responses.
- Evaluated system performance on response accuracy and relevance metrics as part of formal academic research.

Technologies: *Python, Machine Learning, Pre-trained Language Models, Rasa NLU*

Writer Gate – Blog Writing Platform | Second Year Project

2022 – 2023

- Built a full-stack blog platform enabling users to create, read, and search articles, leveraging REST-style backend logic with Node.js.
- Developed article search and reader-facing features, improving content discoverability across the platform.
- Implemented a topic suggestion engine to help writers identify high-engagement content ideas.
- Designed and delivered responsive frontend interfaces for article browsing and search using Next.js and Material UI.

Technologies: *Next.js, Node.js, Material UI, MongoDB*

CERTIFICATIONS

- Comprehensive Master Java Developer Diploma – IJSE
- CCNA Modules 1, 2, 3 – Cisco Networking Academy

REFEREES

Dr. A.L.A.R.R. Thanuja

Senior Lecturer, Dept. of Computational Mathematics
Faculty of IT, University of Moratuwa
